

# American Express® Billing Support Files

The integrated booking format for billing

Payment solutions that save time and money.

Modern accounting relies on the availability of billing data. Billing Support Files provides enriched data compatibly, promptly and securely.

## American Express® Billing Support Files

# Would you like to economically integrate Corporate Card billing data into electronic accounting and benefit from lots of additional useful data?

Give your data free rein, individual adaptation of all electronic billing data in your preferred format.

Effective accounting today largely works without paper receipts. Billing Support Files take this development into account. The electronic file allows you to tailor data to your preferred format.

This fulfils the requirements for being able to process all statements electronically. BSFs are adapted technically so that they can be integrated into your accounting system.

BSF provides much more information as compared to your paper bill. After client assessment the level of information required is defined and provided accordingly. There is also the option of calling up data outside your billing cycles.

Sensitive data is transferred to you using a secure method, either using Secure File Distribution (SFD) where you receive the BSF as an encrypted file attachment or using Secure File Transfer (SFT) where you call up the BSF from a secure website using a login and password.

With Billing Support Files Companies receive Corporate Card billing data enriched with valuable information and compatible for integration into your accounting system.

### Combine BSF with other American Express products such as:

- Corporate Card
- Business Travel Account (central travel purchasing)
- Corporate Meeting Card (CMC)
- Corporate Purchasing Card (CPC)

### The most important benefits

- Electronic integration of billing data into your desired systems (accounting, expenses billing etc.)
- Efficient and paperless format
- Information can be used for analysis and account reconciliation, cost control and spending checks
- On request, customised adaptation of export files
